

2020 Census Redistricting Data (P.L. 94-171)

Noisy Measurement File

There are approximately 25 trillion numbers associated with the combined redistricting data and DHC Noisy Measurement Files, consuming 33 terabytes of space in a compressed format.

Given their large size, the files are housed and accessible via two locations: the Inter-university Consortium for Political and Social Research (ICPSR) and the Harvard Dataverse.

Use the links below to access the files.
